DATABASES: SQLite, Postgres

TOOLS: VSCode, Docker, Vite, Render, Vercel

WORK EXPERIENCE

SOUL SITES >> Web Developer > Remote > React, Next.js, MUI **October 2022 – Current**

- Designed responsive sites customized to clients' specific needs with backend capabilities if required.
- Increased the visibility of businesses by adding an online presence to their company.

DECIMAL ENGINEERING >> Silkscreen Technician > Coral Springs, FL **March 2023 – Current**

- Helped open the new silkscreen department as the primary operator for all silkscreen jobs under the lead supervisor.
- Applied creative solutions to set up parts for various painting jobs, utilizing training to optimize completion time.

ACV TECHS >> HVAC Technician > Margate, FL **August 2021 – March 2024**

- Troubleshoot and repaired fixtures providing detailed descriptions to clients with fair prices and swift completion.
- Learned the craft quickly, receiving my own truck and servicing clients on my own after a short time.

MATER BEACH ACADEMY & CARVER MIDDLE SCHOOL >> Math Teacher > Surf Side-Delray, FL **January 2017 – June 2021**

- Worked with lower students providing custom lessons starting at their skill level keeping a detailed record of progress.
- Raised their average scores by one to two letter grades by finding areas of improvement more efficiently.

PROJECT EXPERIENCE

BALLERS LAB LEAGUE >> Women's Basketball League Website > React, Redux, SQLAlchemy [GitHub](#) > [App](#)

- Introduced game stat input system utilizing SportsVision API to provide up-to-date team and player stats of past games from video recordings.
- Designed dynamic pages using React useContext to populate various game days, games and game stats in an easy to use interface.

SEW POSH >> Upholstery Website > React, Next.js, MUI [GitHub](#) > [App](#)

- Created a reviews page using Elf Sight to embed a widget with overall ratings, current reviews, and the option to add a review.
- Utilized Next.js and MUI and to introduce interactive and dynamic gallery pages where pictures are populated based on the category which can be viewed in a slideshow and in full screen.

SOUL ACADEMY >> School Portal App > React, Redux, Flask, SQLAlchemy [GitHub](#) > [App](#)

- Developed an interactive grade book using React.js to supply teacher users the flexibility to create and edit assignments and grade in an easy-to-use interface.
- Utilized Flask and Redux to establish a dual-login system where user dashboard and site access are determined by whether the user is teacher or student.
