**DATABASES:** SQLite, Postgres
**TOOLS**: VSCode, Render, Docker, Vite

## WORK EXPERIENCE

**FREELANCE DEVELOPMENT** >> *Web Developer* > Remote                                      **October 2022 – Current**
- ● Designed responsive sites customized to clients' specific needs with backend capabilities if required.
- ● Increased the visibility of businesses by adding an online presence to their company.

**DATA ANNOTATION** >> *AI Trainer* > Remote                                      **October 2023 – Current**
- ● Train AI to provide correct responses to programming questions writing detailed notes critiquing responses.
- ● Improved multiple program-focused AI to handle complex algorithms and multi-page applications.

**ACV TECHS** >> *HVAC Technician* > Margate, FL                                      **October 2021 – March 2024**
- ● Troubleshot and repaired fixtures providing detailed descriptions to clients with fair prices and swift completion.
- ● Learned the craft quickly, receiving my own truck and servicing clients on my own after a short time.

**MATER BEACH ACADEMY & CARVER MIDDLE SCHOOL** >> *Math Teacher* > Surf Side-Delray, FL        **January 2017 – June 2021**
- ● Worked with lower students providing custom lessons starting at their skill level keeping a detailed record of progress.
- ● Raised their average scores by one to two letter grades by finding areas of improvement more efficiently.

## PROJECT EXPERIENCE

**SOUL ACHADEMY** >> **School Portal App**                    **github.com/sause668/soul-class** > **soul-class.onrender.com**
- ● Developed an interactive grade book using React.js to supply teacher users the flexibility to create and edit assignments and grade in an easy-to-use interface.
- ● Utilized Flask and Redux to establish a dual-login system where user dashboard and site access are determined by whether the user is teacher or student.
- ● Implemented fully dynamic pages using SLQAlchemy and Redux to populate pages based on user specific data with React based modals providing full CRUD capabilities to class, assignment, and grade tables.

**HONEY STOCK** >> **Stock Trading App**                    **github.com/sause668/stock-trading-app** > **stock-trading-app-qlg7.onrender.com**
- ● Introduced real-time stock data utilizing Polygon Stock API and  ReactChart.js  to supply stock information to the stock info page with an  up-to-date chart displaying the history of a given stock's price over a period of time.
- ● Designed a dynamic dashboard using SLQAlchemy and Redux to populate based on user specific data with Polygon Stock API calls used to provide real-time data for portfolio and watchlist stocks.

**SEW POSH** >> **Upholstery Website**                    **github.com/sause668/sew-posh** > **sew-posh.vercel.app**
- ● Created a reviews page using Elf Sight to embed a widget with overall ratings, current reviews, and the option to add a review.
- ● Utilized Next.js and MUI and to introduce interactive and dynamic gallery pages where pictures are populated based on the category which can be viewed in a slideshow and in full screen.
